Personal Profile

MSc (Cybersecurity) student targeting Cloud and DevOps roles. Built projects around IAM, CI/CD, and container security using Docker, Kubernetes, Helm, and ArgoCD. Automated pipelines with GitHub Actions, provisioned infra with Terraform, and enforced supply chain security with Trivy, Cosign, and Kyverno - all on AWS with a focus on least-privilege access and production-grade observability.

Technical Skills

Cloud & AWS: EC2, IAM, S3, VPC, Lambda, CloudWatch, CloudTrail, DynamoDB, ElastiCache, SNS, SQS, Systems Manager
DevOps: Linux, Terraform, Docker, Kubernetes, Jenkins, Helm, ArgoCD, GitHub Actions
Security: Trivy, Cosign, Falco, SonarQube, SealedSecrets
Observability: Prometheus, Grafana, OpenTelemetry, Loki, Alertmanager
Languages: Go, Python, TypeScript, Bash, SQL, HCL

Experience

AWS Infrastructure Engineering August 2025 – Present
AWS Skill Builder Remote

- Configured IAM with **least-privilege separation** between admin and operational access across users, groups, and roles
- Built CloudWatch dashboards with CPU alarms at **80%** threshold to detect and alert on resource spikes in real time.
- Provisioned EC2 with key-based auth; audited billing, identified **3 cost drivers**, and applied right-sizing across instances.
- Designed a **multi-tier VPC** with public/private subnets, NAT gateway, VPC peering, security groups.

Projects

AegisMesh - IAM | *Node.js, PostgreSQL, Docker, Kubernetes, ArgoCD, AWS ECR, Terraform, Grafana, SonarQube*

- Built a **deny-first** IAM policy engine with role inheritance and simulation; auth covers **TOTP MFA**, **OAuth 2.0**, JWT refresh rotation, and step-up verification for sensitive actions.
- GitOps** via **GitHub Actions** + **ArgoCD** - CI builds and pushes multi-stage **Docker** images to **AWS ECR** on merge; CD patches **Kustomize** overlays; cluster syncs automatically.
- Init containers gate app start on Postgres readiness and **Prisma** migrations; **SealedSecrets** keep credentials out of plaintext Git; smoke test failures auto-revert bad deploys.
- Integrated **SonarQube** into CI with Quality Gate on every merge - cut security issues **48%** in 30 days; **Falco** monitors runtime syscalls for threat detection; **Prometheus + Grafana** track auth, latency, and error rates; **Terraform** provisions ECR.

HookDrop - Webhook Receiver | *Go, Kubernetes, Helm, ArgoCD, Trivy, Cosign, Kyverno, AWS ECR, GitHub Actions*

- Webhook capture service in Go - accepts any POST to a bucket URL, stores last 50 events in-memory, and streams arrivals live via SSE with trace ID logging.
- GitOps** pipeline - GitHub Actions runs **Trivy** scans, signs images with **Cosign** OIDC, pushes to **AWS ECR**, and bumps Helm values so ArgoCD syncs automatically. Renovate handles dependency PRs.
- Hardened runtime - non-root UID, read-only filesystem, dropped capabilities. **Kyverno** blocks latest tags, missing resource limits, and unsigned images at admission. **OpenTelemetry** traces, **Prometheus** metrics, and **Loki** logs feed Grafana with **Alertmanager** on top.

DeployLens | *TypeScript, Node.js, PostgreSQL, Socket.io, AWS CodeDeploy, GitHub Actions*

- Correlated GitHub Actions and **AWS CodeDeploy** events via commit SHA into a unified pipeline view; live status streamed via **Socket.io**.
- Ingested events via webhooks across 2 providers with polling fallback; normalized into 4 deployment states across environments.
- Secured with CSRF, webhook signature validation, and **AES-256-GCM** encrypted storage - no plaintext secrets at rest.

Leadership & Activities

Google Student Ambassador – Gemini 2026 – Present
Google

- Conducted **5+ peer interviews** gathering student feedback on AI tool adoption for Google's Gemini ambassador initiative.
- Led Gemini demos at **CHARUSAT University**, showcasing AI-assisted debugging, documentation, and developer workflows.

Education

Charotar University of Science and Technology (CHARUSAT) Nadiad, Gujarat
Bachelor of Computer Applications | CGPA: 8.9 2023 – 2026

Gujarat Law Society (GLS) Ahmedabad, Gujarat
Master of Science (Cyber Security) 2026 – 2028

Certifications

AWS Cloud Practitioner Essentials |
AWS Cloud Quest: Cloud Practitioner |
